25X1A 2. [REDACTED] advises me that devising and analyzing 25X1A
the cross-impact model will probably require two to
three full days of the analysts' time, with some part-time
work on additional days. I understand that it will not
be necessary for all of the analysts to contribute to
the actual writing up of the final paper, although they
will of course be asked to review it. In view of our
already heavy Middle East production schedule, therefore,
I must request that [REDACTED] not be tasked with
helping to write up the final report.
